

Week 1: Python Basics - Your First Steps in Programming

1. Install Python - follow step-by-step guide for your operating system
2. Write your first 'Hello World' program and run it
3. Create variables to store your personal information (name, age, city)
4. Practice basic math calculations in Python
5. Create a list of your favorite foods and learn to access them

Project:

Create a Personal Introduction Program that asks for user's name, age, and hobby, then displays a friendly welcome message with their information

Tips & Resources:

Search YouTube: 'Python absolute beginner tutorial no experience' Don't worry about mistakes - every error helps you learn Practice 30 minutes daily instead of long sessions occasionally Use Google Colab if installation is difficult - it runs in browser Join free Python communities for beginners on Discord or Reddit

Write your first 'Hello World' program and run it

```
In [1]: print("Hello World")
```

Hello World

Create variables to store your personal information (name, age, city)

```
In [2]: from IPython.display import Markdown
name = "Sanskriti"
age = 22
city = "Pune"
Markdown(f"My name is **{name}**, **{age}** years old and I live in **{city}**.")
```

Out[2]: My name is **Sanskriti**, **22** years old and I live in **Pune**.

Practice basic math calculations in Python

```
In [3]: a = int(input("Enter a number:"))
b = int(input("Enter a number:"))

def cal(a,b):
    print("Addition :" , a+b)
    print("Substraction :" , a-b)
    print("Division :" , a/b)
    print("Multiplication :" , a*b)

cal(a,b)
```

Addition : 120
Substraction : 40
Division : 2.0
Multiplication : 3200

Create a list of your favorite foods and learn to access them

```
In [4]: food = ["Pasta", "Paneer", "Pav Bhaji", "Cake", "Rice"]
print(food[0]) #accessing element
print(food[-4])
for i in food:
    print(i, end=" ")
print()
print(food[:5])
print(food[-3:])
```

Pasta

Paneer

Pasta Paneer Pav Bhaji Cake Rice

['Pasta', 'Paneer', 'Pav Bhaji', 'Cake', 'Rice']

['Pav Bhaji', 'Cake', 'Rice']
